

Theme: Economic Development.

Comments:

- Clean, non-polluting business & industry that provides jobs for locals
- Continue to look for economic growth areas
- Big better businesses to that area w/ good paying jobs
- Support small local business
- Tax incentive for business offering WFH and/or Flex time to spread out the rush hour
- Quality Jobs to Lake Wylie, not Walmart's and Zaxby's!
- The arts drive economic development, revitalization, tourism growth, attract jobs. Keep supporting cultural facilities with A-tax and H-tax. A recent feasibility study show that York County can support a 500-800 seat performing arts/education facility. Let's do it collaboratively.
- Keep all building codes/standards high, without red tape. Keep costs affordable.
- Solar and wind power
- Promote brewpubs in abandoned buildings
- Get more white collar jobs
- Need smaller homes for singles, divorcees, elderly, young adults more multifamily to make housing more affordable especially in western part of the county.
- Make reimbursement mandatory for tax incentive deals if companies leave within 10 years
- Teach High School students a skill/trade as part of curriculum, even for college track kids. Tech skills, construction, etc.
- York County will be a premier, regional arts destination, attracting hi-tech jobs, tourism, growth and job opportunities.
- Promote economic viability of downtown areas
- Rooftops bring businesses and jobs
- Build an Agro Tourism facility
- Support economic development through our natural areas. Scenic Catawba River could be a national draw for tourism
- Support agricultural tourism & horse industry

Theme: Roadways.

Comments:

- Increased Connectivity with Lancaster Co. Panhandle
 - Additional customers for existing retail/Trade Zone Expansion
 - Access to larger workforce/employees
 - Higher tax base along Dave Lyle Blvd. Corridor
- More bridges over the Catawba River
- More roads, improved roads in northern part of county
- Roads need to catch up to development
- Hwy 160 West is intolerable now
- Need another road crossing the river, especially need it North of Celanese.
- Maintain our local roads

- The back roads SUCK! We've been here a year and lost 3 tires already, stop band aid fixing them b/c the same holes come back every winter! Fix the roads!
- Widen current arterials
- Widen Buster Boyd Bridge or build another bridge
- Traffic impact study for whole area impacted by traffic generated by developments
- Traffic for current & future developments is insane! No plans to widen bridge or 49 as only corridor into Charlotte – Stop building and catch up roads! Too many housing units = too many cars on the roads!
- Too much traffic & too many traffic lights on HWY 49! Slow growth on 49, build frontage roads
- Stop pennies for progress. Wider roads = more developments, more developments = more people and traffic = more infrastructure.
- Currently a hazardous traffic situation exists with traffic exiting Allison Creek Road onto Hwy 274. This situation will now be made even worse with the new addition of 600 more homes on Allison Creek Road. How did this happen? Where is the planning! Current environmental rules are not enforced (Baker LN) traffic impact studies are being ignored by planning dept. conflict of interest in planning commission Lake Wylie is not being protected.
- Roads that we have need to be repaired.
- Don't need more roads or adding lanes to get to Charlotte!
- Some sort of interim step to patch pole branch
- Must widen 49, less lights, stop building on 49, need a bridge connecting Tega Cay, LW, FT beside the Buster Boyd.
- Expansion of road access to Charlotte. Fix potholes on back roads!
- Peninsulas already developed w/established homes & empty, large lots that will probably continue to develop –those roads need extra support for the increasing weight of home and transportation. Example (Allison Creek Rd. Only 2 lanes for the in and out. What if there is an emergency and one blocked lane? Another disaster).
- Too much traffic; stop development
- No more high density residences (apartments) on Hwy 49 between Buster Boyd & 4 points intersection. Already backs up during peak times
- Pole Branch Road – 5 lanes; 3 is insane!
- Our Roads are already parking lots at rush hour. More development will make it total grid lock (like LA or NY)
- Guinn St. Clover is in horrible condition and needs re-paving. No more inadequate patching!
- Roads already in despair, high density housing exacerbates it and adds to traffic backups at rush hour
- High concentration of housing leading to traffic. Steele Creek area in disrepair-concern about crime. Big box vacancy concerns. Gaston Garden Parkway is a bad idea! Condition of 279 is awful
- Traffic is already overwhelming Hwy 49. Stop building. Garden parkway has to be built. Mt. Gallant/Sutton Rd. Connection has to be built. Do we have a plan for an eight (8) lane Buster Boyd Bridge?
- Traffic at 77 Gold Hill & Traffic officer during rush hours
- Pennies projects take far too long – ones from 2003 not even started. The ballot said, "Multi-lane" – that is 2 lanes in each directions. After the fact, it is changed to left turn lane in middle.

That is still a 2 lane road. Worthless, solves nothing, not what was on ballot. Bait & Switch??
Waste of money.

- Developers should put turn lanes into sub div. Not taxpayers.
- Road system that doesn't take 20 minutes to drive to miles!! 21/160/Springfield Pkwy need I go on?
- Plan roads before building. Have developers contribute. Replace trees on roads. Bike and walking trails. Walking trails to schools.
- Roads are 10 years behind. Catch them up.
- Pennies too slow! Projects 15+ later not even started.
- Sam Smith Road too narrow with much school traffic
- Doby Bridge @ White Grove
- No school bus stops on main thoroughfares!!!
- Turn on pedestrian signals @ Heckle & Hwy 5
- Pleasant Rd & Gold Hill need turn signals
- 160 Up into 49 backs up for miles
- US 21 N. Phase 1 and 51 completed. Details on what planned for Old Watsons Road at intersection of Hwy 21.
- Wimbleton Woods turning on to Sutton Rd. trees & curves
- Traffic at Gold Hill & 77N to be addressed
- Fix Roads (potholes, widening, complete streets)
- 160 through town & out to Ballantyne needs 4 lanes!
- Turn Lanes
- Roads that are not obsolete upon completion
- New interchange @ Coltharp & 1-77. Connect Do lay's Bridge & Dave Lyle Corridors
- What's planned for intersection of Gold Hill and Hwy 21? How will traffic from apartment complex get in & out of Hwy?
- More traffic lights – more delays! No more please
- 77 & Gold Hill – put (2) turn lanes until diamond is constructed.
- Too much growth @ 160 & 77. What is plan for 5400 vehicles?
- Gold Hill Traffic congestion to 1-77. Need automation to change traffic lights efficiency for high traffic conditions.
- Blackburn Street and Ross Canon Street are in terrible condition
- Stop growth and let roads catch up
- Pennies for Progress needs more support roads to handle new development
- Use portion of pennies money for maintenance of roads
- Better street connectivity- allow roads to be more efficiently- save money- everyone gets around better and safer
- Quit building new roads and bridges until all the existing roads and bridges are up to standards

Theme: Public Transportation.

Comments:

- Also Public Transport would help with in town traffic

- Public transport between CLT and Rock Hill
 - Bus
 - Rail
- Public transportation – Western York County
- Public Transportation
- Scheduled buses serve each community at least 1 a week to Rock Hill and York
- Transit?
- Mass Transit

Theme: Walking/biking.

Comments:

- Include sidewalks/walkability & bike ability in all planning- residential, commercial, retail, and schools including bike racks at businesses, retail, and schools.
- Bike to work
- Include bike & pedestrian considerations in all land use, retail, single family, mixed used, and rural
- More sidewalks and bike lanes.
- Please make it safe for all to ride their bikes and walk the streets of Rock Hill
- Need more bike routes especially along streets in town
- Connect Bike Trails
- Add wider sidewalks/bike trails
- More sidewalks and bike paths and bike lanes.
- No bike trails on 49
- 40% of green space in all developments
- Multi-use trails including equestrian
- Build rails to trails, build trails for hikers, horseback riding, and bicycles.
- Bike Lanes/ Trails to enjoy
- Sidewalks in all developments
- Walking trails! Bike paths
- More golf cart/walking/bike trails
- Bike lanes to get to stores
- Sidewalks required for all new developments
- Sidewalks make condition of approval for all new construction.
- Connectivity between developments.
- Gold Hill sidewalks on edge of road. Vehicles are traveling @ 50+ mph..
- Multilane roads, bike, walking, trails, sidewalks. Commercial setbacks greenspace
- Alternate ways of getting places (bike paths, lanes, and sidewalks)
- Green Space with bike/walking sidewalk between roads and commercial areas
- Please clear the shoulder for a bike lane
- Support for multi-modal transportation, not just cars
- Sidewalks- absolutely

- Bike Lanes
- Better roads county-wide with good bike lanes
- Protect encourage wellness
- Alternative transportation (bike/ped supports air quality)
- Separated bike lanes
- Safe Bike Lanes
- In downtown York and surrounding sidewalks are “marked” for repair. Need ASAP
- Cycling is a sport, keep off main roads (disagree: often used for transportation)
- Greenways, greenways, greenways
- Land and protected greenways

Theme: Type of development wanted/not wanted in York County.

Comments:

- More dining opportunities (including outdoor)
- Would like to see a larger conference center complex with hotels enough to draw professional meetings. Maybe part of Knowledge Park
- Hotels closer to Winthrop Campus/downtown
- How many Walmart’s does York County need?
- Stop dumping and businesses that have fleets of (tractor trailers) trucks or businesses w, Heavy Trucking. It is stopping desirable business due to non-attainment Good clean businesses will not come to the area! Would like 21/Anderson Rd. South to become commercial not light industry. The area desires development of strip malls/stores
- Less apartments
- Stop the Wal-Marts, stop the apts, and stop the too crowded housing.
- Need coordinated commercial development with recurrent theme..that is not strip shopping! Something with class.
- The property in Bowling Green where the mill was located needs to be cleaned up.
- We need a place for teens!
- Limit new housing development.
- More Green Space. Less development of high density housing.
- No More Apartments.
- Limited density of homes in developments
- Increase commercial use to Oak Ridge Road area from Lake Wylie current business area
- No more apartments! Custom built homes on large lots!
- No more high density developments
- No more storage facilities
- Not another Tega Cay
- We need places for teenagers to enjoy themselves
- Build the Waterfront with businesses
- Too much High Density housing given road system, schools, water & existing traffic w/o considering weekend recreational traffic around the Lake – Solution: Blow the bridges!
- Increase commercial area from Lake Wylie business district to Oak Ridge Road area
- No more apartments. Our infrastructure cannot support all this development

- Stop high density developments
- Limit density to 2 homes/acre including townhomes
- Density/Crime/water quality/quality of life/max per acre/wildlife habitat/infrastructure overloaded/parks and rec beyond the lake/public lake parks/bike/walking trails/no more apartments!
- High-end shopping/dining needed in Lake Wylie area to entertain residents in Ft. Mills & Tega Cay so we don't have to drive Baxter or Rock Hill all the time. Could possibly work in 77/Gold Hill area along Springfield Parkway. Maybe a good opportunity for development that would mimic Birkdale Village in Huntersville, NC.
- No destination commercial development (retail) like Target that will draw more people to FM! Kingsley will be a "destination"
- Protect properties near 1-77 for future economic development projects (FM, YC, RH)
- Development/commercial – should not be taxed to the maximum. Should not impact residential/peace of mind, etc. Developers should be required to pay impact fee if significant.
- Hospital
- Not only do FM residents not want piedmont, we do not want a hospital on the proposed land on 160 @ 21! Keep the peach trees!
- With 5,400+ jobs coming to the now-under-construction Kingsley Business Park, how are we residents going to get through that intersection of 160 @ I-77
- No more apartments/multi-family dwellings in FM! Maximum of 1-2 houses per acre!
- Commercial Businesses – Limit fast food restaurants. Gas/Tire/Carwash- enough!
- Need lower density housing & more active entertainment (bowling, movies, etc.)
- Limit industrial and distribution uses to within a mile or so of 321 and other major corridors. Areas with good roads and access to I-77.
- Concerned about unbridled building
- Keep water clean, keep land clean
- Encourage less 1 story buildings → they are a waste of space and are bad for water quality
- Develop criteria for scenic overlays
- Have additional overlay around Lake Wylie
- Limit number of houses/acre

Theme: Form of development wanted/not wanted in York County

Comments:

- Need for more mixed-use (yes, I agree) areas where residents can work/live/play in same area
 - Master-planned communities w/amenities
 - Areas designated for business and commercial development along major roads up employment and lower traffic
 - Compact communities design with parks and open space preservation
- Centralize development areas: High density and walkability; look at Piedmont in Charlotte.
- Provide sidewalks, parks, parking in developments
- Planning for developments need more space for emergency entrances and larger lots

Theme: Growth Management.

Comments:

- Controlled residential growth
- Stop unchecked residential growth in Lake Wylie Area. Make Lake Wylie more accessible
- Tiered System: Distance from Lake Wylie. Reconsider the formula for construction: worth acreage, impact fees, commercial and residential. Overall goal: Preserve the lake, water supply for future generations
- Need adequate facilities ordinance to control over development
- Encourage development around Lake/River but ensure public areas/access
- Limit development- Why are you afraid to do this?
- -No high density apts. or housing developments
- No heavy industrial East of US 21 & South of Anderson to County line (except existing)
- Eliminate By-Right zoning. It is not beneficial for our future
- Institute the Lake Wylie overlay to protect water quality and the environment. We need immediate relief from traffic congestion, lack of road planning and residential over building. Too much density
- Blow the bridges
- Call a moratorium on all residential development in Lake Wylie until there are plans in place to handle increased traffic for new developments, new schools to handle the overcrowding that is coming in a few years and environmental controls to protect Lake Wylie & area water ways. For status-No rock quarry.
- More development is killing our economy in Clover. It cost more to keep the roads and schools built than the income from Development
- Change zoning now. Get away from high density.
- Increase property tax if that will limit development.
- Change zoning. Too many apartments.
- Why allow so many new apartment complexes? This only increases density, not quality
- Growth with a plan first! Put a moratorium in place until the "Overlay" is in place
- Keep land use around the lake low density-protect the lake our greatest asset.
- Moratorium on growth: otherwise: Destruction
- Limit building permits to slow growth until infrastructure catches up
- Fort Mill, Tega Cay & York County adopt impact fees to make growth pay for growth
- Agree with impact fees – charge something for moving into the area.
- Impact fee – developer must pay. Mandated to provide lanes, greenspace
- Slow growth by impact fees. Strategy plan – read info & money allocation before appointment.

Theme: Infrastructure.

Comments:

- Mandate that utilities share right of ways
- Creative ways to fund roads/infrastructure
- Need to evaluate water & sewer capacities given projected growth
- Extend Urban Services bounty east of Rock Hill to Catawba River in order to accommodate Dave Lyle Boulevard plans and to discourage septic systems near the river

- Lack of infrastructure
- Do we have sufficient water & sewer supply for growth?
- Can a moratorium be imposed until an effective plan is in place for infrastructure?
- York County is not keeping up with infrastructure
- Build an infrastructure to support all the building before allowing the developers to build. (Make the developers pay)
- Regional Water/Sewer Authority
- Independent commission to manage water and sewer facilities
- Service Clover with York County water
- Bury utility lines
- Come up with a different solution to BMP “forever bonds”
- Look at reuse of wastewater output—no privatization will increase cost due to need for profit
- Build a water treatment plan in the northern part of York County
- Long range plan to build a water treatment plant
- Coordinate with Chester County on water and sewer

Theme: Natural Resources.

Comments:

- Stop clear cutting and preserve native species plants on which birds depend.
- Preserve buffers with native species
- Habitats to increase quail, whippoorwill, and others
- More land conservation in Eastern York Co.
- Contain Sewage spills Lake Wylie
- Preserve the quality and beauty of the Lake Wylie area – Especially the lake itself. Too much development is further endangering the lake.
- Enforce the storm water management from the time ground is broken through completion! The regs are there, use them!
- Need better erosion control over development
- Quit allowing clear cutting of large tracts of land; makes more runoff and other problems.
- What is the status of the Lake Wylie Overlay – Long Term planning must include environmental protections for neighborhood creeks, streams, and Lake Wylie & Catawba River. Low impact development practices must be instituted.
- Protect the Lake Area. Sedimentation controls enforced
- Buffer zones increased to 150’ and enforced
- Stop mass grading for developments
- Leave trees – particularly champion trees
- Highway Frontage Buffers – Keep trees
- Keep our lake clean- Get rid of Utilities Inc. at River Hills!
- Air quality
- More green space & wooded areas preserved – limit “cookie cutter” neighborhood clearing.
- Keep water clean

Theme: Open Space.

Comments:

- Urban open space – plan to conserve greenspace as redevelopment occurs
- Need more protected areas along rivers/lakes. Build only across a street from water, on the water make public area
- Better preservation of open space – 25 acres per 1000 pp for parkland
- Fund York Co. forever
 - PDR
 - Open space preservation
- 40% Green space in all development plans
- Still unspoiled rural areas. Reasonable Costs. Peace and quiet, beautiful areas.
- Save some of the natural land for our children.
- 40% Green space in each dev; do not count gullies as green space
- Preserve open spaces, farmland, and woods. Our wildlife is disappearing.
- 40% Greenspace on all development plans
- More public Green space.
- 40% open space in any development
- Keep some green space for us.
- 40% buildable green space in each dev
- 30% of usable land for a “Green Zone” or recreation
- More green space in developments
- Make green space size requirements. Require “useable” green space
- Make greenspace reqs. high & mandatory
- Greenspaces should be mandated by York County council not given \$ as bonus for developers – (forever wild)

Theme: Parks and Recreation

Comments:

- Provide kayak access on upper Allison Creek and Crowder Creek
- County needs a Parks and Recreation Department, no funds support P&R in non-incorporated portions of the county
- Insure our parks/playgrounds are smoke free and safe for children
- Remember there are two rivers that border county: Think of Broad River as a resource for recreation
- Develop trail heads with restrooms and picnic shelters
- YC need a Park/Rec dept....most valuable asset is Lake and Lake Access, picnic areas, trash cans are needed
- York County need Rec/Park facilities in unincorporated areas.
- Parks Dept. that is in county areas vs. Just City of Rock Hill (yes, establish a York County Parks & Recreation Department
- Develop rural areas with connecting trails for walking, hiking, bicycles & horseback riding.

- Better river access for picnics, canoeing, kayaking near Catawba. Indian Nations Lands-small parks along river
- Please realistically consider park(s!) for Lake Wylie Area and recreational programs!
- Provide kayak access to Crowder Creek and Upper Allison Creek
- Green space! Parks! Recreational Areas!
- Better access to our scenic River
- Need a Park & Rec Dept. & get some Parks/Land etc.
- More recreation support in communities, not just town
- Build a Kayak/Canoe Launch @Buster Boyd Boat Ramp.
- Establish county park & Rec. dept. and administer funds for all of county rec.
- More recreational areas in Western York County
- Create Parks, Rec area for our children. If quality of life leaves, we leave!
- Build larger dog parks
- Build fairgrounds – have county fair every year. Host events all year long. Riding arena, barns.
- YC needs Park & Rec dept..boat launches have no tables, shelter, trash cans. Lake is biggest draw but with no access to lake or emphasis on it..We lose! It is a missed opportunity for county.
- Develop area for recreation. Connecting trails to neighboring counties. Dog Parks. Fairgrounds in Clover for events all year. Barn area, riding arena, a lake that is stocked & available for fishing, flower gardens, tree planting.
- Ice rink for use all year by schools and public
- Add walking trails and recreation areas
- Recreational Areas – Western York County
- Public Parks in Lake Wylie
- Connectivity between developments recreation area – more fields.
- York County needs a Park & Recreation Dept.
- Need a York City Recreation Dept. (x4)
- Increase amount of space developers need to leave vacant for recreational activities.
- We need a county parks and rec department

Theme: Health.

Comments:

- Future Vision: York County is considering “health impact” in all policy decisions; York county truly exhibits a “culture of health”
- No smoking in public parks/playgrounds
- More access to healthy food and community garden areas
- A County Health Board to help county be more mindful of land use & funding impacts on health
- Please monitor the ratio of fast food restaurants/vs eat-in restaurants (this data is available via the census bureau) York County has too many fast food establishments (serving calorie-dense food that is fattening up our county) for its population
- Need to get rid of food deserts
- Include location of groceries/supermarkets/farmers market throughout county
- Provide areas for community gardens, apartment dwellers
- Create a community health board to provide a unified public health plan for the county

Theme: Government.

Comments:

- Work Collaboratively with all municipalities on future land use strategies
- Everybody work together in Eastern York Co- County, City, & Town!! No more waiting, passing the buck or excuses. It's probably too late but may save other parts of York CO.
- Planning commission representation must be balanced. Loading w/developers, builders and real estate professional is a conflict of interest.
- County does not respect wishes of residents.
- Planning commission-conflict of interest..most builders or related to development.
- Transparent planning commission; let citizens know what is going on
- Get developers off planning commission
- Public Hearings before decisions
- A county and town (Fort Mill) where planning officials work together
- Can there be interaction between York County, Fort Mill and others to determine best plan for growth?
- Let's start/push/shove Fort Mill/ Tega Cay/County to start talking & planning & doing something-anything! (Together)
- People who make decisions and plans should have to drive around FM/TC before approving plans.
- Cooperation with county & towns for roads & development

Theme: Schools.

Comments:

- School district quality and qualities of life – Please preserve this or York Co. will decline!
- We moved to clover excited about the schools...very impressed with the C.H.S
- Community Schools/ Not a Giant High School Factory.
- Rethink the 9th grade center. Historically they are a bad idea
- We do not want bigger class sizes to accommodate low income students. This is a whole new problem on its own. I am former Clover certified teacher.
- Ft. Mill has enough schools.
- Allow schools to keep up with growth so kids don't suffer
- What will happen if school bill does not pass (Fort Mill)? Classroom overcrowding? Lower quality educations? Operating funds will be used to rent portable classrooms instead of paying teacher & other operating expenses.

Theme: Changing demographics.

Comments:

- Pay attention to York County's aging population > "aging in place" requires public transportation amenities & mixed-use denser development
- Senior housing
- Ft. Mill needs affordable senior apt.

- Affordable transportation for seniors

Theme: Miscellaneous

Comments:

- Century Farm Status should be designated on all maps.
- Preserve the things that attract people to our county to begin with
- Respect for agriculture: provide buffers to farms when development encroaches. Keep some agriculture throughout the county.
- Density is such that emergency evacuation is impossible
- Too dense for adequate fire protection
- Respect and protect historic districts

Theme: Rock Quarry

Comments:

- Prohibit all mining in areas that drain into Lake Wylie, especially Clover and Bowling Green areas
- No rock Quarry!
- Do not want quarry on Ridge Road to affect our home.
- No ROCK QUARRY!
- We all agree.
- No Rock Quarry Please!
- Stop the Quarry
- No Rock Quarry!
- No Rock Quarry –Ridge Rd – Destruction of roads already in disrepair, high traffic
- No Rock Quarry – will destroy roads & communities.
- Do not allow the rock quarry!!
- Please, Please, Please – No Rock Quarry! The water level is only at 70ft. Roads are bad enough. Bringing in truckloads of water to our homes is not a solution to damaging our wells. The beauty of clover will forever be destroyed!
- No Rock Quarry – Please! It would destroy the beauty of the area among many other problems it would create.
- we are NOT happy about the Quarry coming to Clover
- No Rock Quarry – home values it will destroy & roads in York. Water table will also be affected
- No mining in York Co!!! ASAP!!
- No mining in York County
- No quarry! It will destroy clover
 - Lower property values
 - Make our Roads even worse
 - Cause Air Pollution - Dust
 - Noise Concerns – Blasting
 - Home Foundations Issues
 - Wells could be damaged
 - Loss of wildlife habitats

- Trucking is dangerous and noisy
- Remedy for damaged wells is trucking in water
- Quality of living would be lost
- Affect watering of livestock herds if wells ruined
- If rock quarry is approved who is buying our home? Who is fixing our roads (Ridge Road)? Who is paying for damages done to our vehicles from passing trucks? Broken windows, etc.? It is really sad to think tax payer really don't have much of a voice against \$\$ signs.
- No rock quarry. Poor planning. Roads all need repairs. Property values will have no value at all with quarry. Drinking water will be affected w/ quarry. Traffic concern with large trucks up& down roads.
- No quarry! Danger to motorist along ridge rd. /321. Road repairs. Damage to foundations. Damage to pools. Damage/contamination of wells. Drop in home value. Dust. Noise. We would move the family and our business out.
- Quarry North of York is not appropriate for the development of the county. Proposed quarry on Ridge Road in Clover will:
 - Lower our property value
 - Effect Water table
 - Roads will not sustain traffic increase
 - Proposed quarry is surrounded by homes with York city long term residents who want to continue to enjoy and preserve their communities
- No rock quarry
- No rock quarry!
- Stop the quarry. I came to clover to escape noise and congestion, good schools. I want to live in my little peaceful neighborhood. Need for safe roads. Stop the development.
- No quarry! Agree!
- No rock Quarry in Northern York County. Home values and Road will go down.
- No rock quarry –Preserve wildlife & water
- No rock quarry in Northern York County
- The rock quarry will kill our town & community
- Concerned about water supply, roads, & traffic if quarry allowed to come in
- No rock quarry – Bowling Green/Clover
- No rock quarry –effect on water table, destruction of roads, destruction of property values.
- No mining in YC.
- No rock quarry – will destroy property values, will affect water table
