As of January 2009, York County Animal Control began using the Asilomar Accords guidelines and definitions for classification of our euthanasia categories.

Using the definitions referenced in the web links below, our reported categories of euthanasia for behavioral and medical conditions include animals under Asilomar definitions of unhealthy and untreatable. Our reported adopted animals include all the healthy, treatable-rehabilitatable, and treatable-manageable categories also using the referenced Asilomar definitions on the web links below.
